Professional Summary

Strategic IT Professional and AWS Certified Cloud Practitioner with over 5 years of experience managing enterprise infrastructure, distributed networks, and cloud environments. Highly skilled in bridging the gap between on-premise hardware and modern cloud architecture. Passionate about automating routine infrastructure tasks using Python, optimizing Windows/Linux environments, and maintaining 99.9% uptime for mission-critical enterprise systems. Proven ability to lead cross-functional projects, resolve complex technical faults, and deliver highly reliable technical solutions in fast-paced, multi-site environments.

Core Competencies

- Cloud Infrastructure & AWS Services
- Scripting & Process Automation (Python, Bash)
- Network Architecture (MikroTik, FortiGate Firewalls)
- Enterprise Systems & Database Administration
- Identity & Access Management (Active Directory / IAM)
- IT Service Management (ITIL) & Disaster Recovery
- Cross-Functional Team Leadership

Professional Experience

Valentine Growers Ltd — IT Officer (Infrastructure & Operations Lead) Nov 2024 – Present | Multi-Site / Nairobi, Kenya

- Architected and maintained stable multi-site network infrastructure utilizing FortiGate firewalls and MikroTik routers, deploying secure cloud-to-firewall VPNs to guarantee 100% reliable remote connectivity.

- Developed and implemented automation scripts using Python to streamline routine system monitoring workflows, effectively reducing manual intervention and ticket resolution times by 30%.
- Spearheaded advanced Windows system optimization across enterprise endpoints, significantly reducing resource bloat and extending hardware lifecycles.
- Executed comprehensive disaster recovery plans and managed daily enterprise database backups, maintaining 99.9% system uptime for critical business operations.

Savanna Flowers PLC — IT Support & Systems Administrator *Sep 2022 – Oct 2024 | Kenya*

- Administered highly available ERP platforms and tracking databases in a high-volume, time-sensitive processing environment, achieving zero operational downtime during peak logistics seasons.
- Administered local Active Directory environments, implementing strict role-based access controls (RBAC) and streamlining user provisioning across the organization.
- Coordinated continuous hardware upgrades and managed the full lifecycle of networked endpoints across 5+ operational departments.

Iguhu Subcounty Hospital — ICT Officer (Technical Support) *Jul 2022 – Sep 2022 | Kenya*

- Secured access and maintained the integrity of high-volume public health databases (HMIS), ensuring 100% compliance with strict data protection and medical confidentiality regulations.
- Diagnosed and resolved complex local area network (LAN) and hardware faults rapidly to support mission-critical clinical service delivery.

Education & Technical Training

AWS re/Start Program — Amazon Web Services (AWS), 2025

- Intensive, full-time skills development program focused on cloud computing fundamentals, Linux administration, Python scripting, networking, security, and relational database management.

Bachelor of Science in Information Technology — South Eastern Kenya University, 2015 – 2020

Certifications

- **AWS Certified Cloud Practitioner** — Amazon Web Services (AWS), *December 20, 2025*
- **Microsoft Certified: Azure Fundamentals (AZ-900)** — Microsoft, *March 2026*
- **Cisco Certified Network Associate (CCNA) Training** — NetAcad, *6 Months*
