

Basil Waswani Okata

Cloud Support Engineer | IT Infrastructure Specialist & Consultant

Kiambu, Kenya | basilokata@gmail.com | [Phone Available upon Request] **LinkedIn:** www.linkedin.com/in/basilokata | **GitHub:** github.com/baz1995

Professional Summary

Strategic IT Professional and AWS Certified Cloud Practitioner with over 5 years of experience managing enterprise infrastructure, distributed networks, and cloud environments. Highly skilled in bridging the gap between on-premise hardware and modern hybrid cloud architecture. Passionate about automating routine infrastructure tasks using Python, optimizing Windows/Linux environments, and maintaining 99.9% uptime for mission-critical enterprise systems. Proven ability to lead cross-functional projects, resolve complex technical faults, and deliver highly reliable technical solutions—ranging from enterprise routing to corporate web development—in fast-paced, multi-site environments.

Core Competencies

- **Cloud Infrastructure:** Amazon Web Services (AWS), Microsoft Azure, Identity & Access Management (Entra ID / IAM).
- **Network Architecture:** Enterprise Routing & Switching (MikroTik RB5009, TP-Link Omada), FortiGate Firewalls, VPNs.
- **Systems & Security:** Windows/Linux Administration, Active Directory, Disaster Recovery, IT Service Management (ITIL).
- **Automation & Web:** Scripting (Python, Bash), Corporate Web Development (WordPress, Wix, Squarespace), API Integrations.

Professional Experience

Founder & Principal IT Consultant *Private IT Consultancy (Registered Company)* | Jun 2026 – Present | Kenya

- Provide strategic IT advisory, infrastructure deployment, and asset management services for corporate clients.
- Design and deploy scalable corporate websites utilizing WordPress, Wix, and Squarespace, managing end-to-end domain transfers and third-party API integrations.

- Transition clients to retainer-based managed service contracts, delivering ongoing monthly maintenance, security updates, and infrastructure support.

IT Officer (Infrastructure & Operations Lead) *Valentine Growers Ltd | Nov 2024 – Present | Multi-Site / Kenya*

- Architected and maintained stable multi-site network infrastructure utilizing FortiGate firewalls and MikroTik routers, deploying secure cloud-to-firewall VPNs to guarantee 100% reliable remote connectivity.
- Developed and implemented automation scripts using Python to streamline routine system monitoring workflows, effectively reducing manual intervention and ticket resolution times by 30%.
- Spearheaded advanced Windows system optimization across enterprise endpoints, significantly reducing resource bloat and extending hardware lifecycles.
- Executed comprehensive disaster recovery plans and managed daily enterprise database backups, maintaining 99.9% system uptime for critical business operations.
- Oversaw critical mail server security resolutions, including advanced DNS record configuration (SPF, MX, A records) to resolve IP blacklisting and ensure mail deliverability.

Digital Systems Lead (Consultant) *Environmental Carbon Credits Initiative | Feb 2026 – Apr 2026 | Kenya*

- Completed a comprehensive corporate website development project from the ground up to support the organization's environmental mission and carbon credits objectives.
- Supported cloud infrastructure optimization and digital presence alignment.

IT Support & Systems Administrator *Savanna Flowers PLC | Sep 2022 – Oct 2024 | Kenya*

- Administered highly available ERP platforms and tracking databases in a high-volume, time-sensitive processing environment, achieving zero operational downtime during peak logistics seasons.
- Administered local Active Directory environments, implementing strict role-based access controls (RBAC) and streamlining user provisioning across the organization.
- Coordinated continuous hardware upgrades and managed the full lifecycle of networked endpoints across 5+ operational departments.

ICT Officer (Technical Support) *Iguhu Subcounty Hospital | Jul 2021 – Sep 2022 | Kenya*

- Secured access and maintained the integrity of high-volume public health databases (HMIS), ensuring 100% compliance with strict data protection and medical confidentiality regulations.
- Diagnosed and resolved complex local area network (LAN) and hardware faults rapidly to support mission-critical clinical service delivery.

Education & Technical Training

AWS re/Start Program *Amazon Web Services (AWS) | 2025*

- Intensive, full-time skills development program focused on cloud computing fundamentals, Linux administration, Python scripting, networking, security, and relational database management.

Bachelor of Science in Information Technology *South Eastern Kenya University | 2015 – 2020*

Professional Certifications

- **Microsoft Certified: Azure Fundamentals (AZ-900)** – Microsoft (March 2026)
- **AWS Certified Cloud Practitioner** – Amazon Web Services (December 20, 2025)
- **Cisco Certified Network Associate (CCNA) Training** – Cisco Networking Academy (NetAcad)
- *Currently Pursuing: Microsoft Security Operations Analyst (SC-300)*
